The Office Action additionally indicates that claims 12 and 13 are rejected, and that the drawings are objected to.

At the outset, Applicants would like to thank Examiner Elve for the courtesies extended during the telephonic interview of December 6, 2004. In the interview, the Examiner indicated that the drawings are objected to as being informal. The Examiner also indicated that the Office Action failed to give a rationale for rejecting claims 12 and 13.

Applicants have included with this Response formal drawings.

Applicants submit that the formal drawings address the Examiner's concerns and therefore request that the objection to the drawings be withdrawn.

Applicants have herein amended independent claims 1 to recite, "at least one magnetic field source disposed to rotate a magnetic field about the vial cup at a rotational speed that varies as a function of angular position." Applicants have also amended independent claims 11 and 18 to contain similar limitations. Applicants submit that the amendments find support throughout the specification and claims as filed including, for example, at page 8, lines 3-12. Applicants submit that none of the cited references teach the above limitation. Therefore, Applicants submit that claims 1, 11 and 18 as well as claims 2-10 and 12-17 that depend therefrom, are allowable over the cited references.

**CONCLUSION**

Applicants believe that they have fully addressed each basis for rejection. Favorable reconsideration of the claims of the subject application and issuance of a Notice of Allowance is respectfully requested. Should the Examiner have any remaining concerns, she is requested to contact the undersigned at the telephone number below so that those concerns may be addressed without the necessity for issuing an additional Office Action.

Respectfully submitted,
